

Hello, QA Engineer

Search test cases, generate automation code, map JIRA tickets, and debug failures — all in one place.

Generate test cases

Debug a failure

Map to JIRA

Write automation

Coverage report

YOU

Find all test cases related to login and show me which ones failed last run.

COPILOT • 0.35

QA

Found **12 test cases** matching "login" across 3 modules. Last run results:

- ✦ TC-001 • Login with valid credentials → **PASS**
- ✦ TC-002 • Login with invalid password → **PASS**
- ✦ TC-007 • SSO token expiry flow → **FAIL** — timeout at step 4
- ✦ TC-009 • MFA bypass attempt → **FAIL** — assertion mismatch

10 PASSED

2 FAILED

JIRA: QA-441, QA-388
